Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 07 June 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 06/07/2006 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 4-6, 13-15, and 22-24 are rejected under 35 U.S.C. 102(e) as being anticipated by Chujoh (US 6,188,792).

Re claims 4, 13, 22, Chujoh discloses the same method, system and computer executed program for video image compression, comprising:

Art Unit: 2621

compressing a video frame of a raw video image data using a processor (117 of fig. 1, Note encoding section (encoder) is considered as a processor for compressing the input video signal; col. 6, line 21+);

storing compressed video image data for said video frame in a buffer (115 of fig. 1, Note output buffer is storing an encoded video data), said stored compressed video image data to be transmitted over a transmission medium (Note smoothed at a fixed output rate (encoding bit rate) by the output buffer (115 of fig. 1), and transmitted as encoded data, and transmission medium, 40 and 41 of fig. 8);

determining whether the processor is limited in its ability to compress video image data to be stored in said buffer (col. 6, line 59+, Note the ability to compress video image data is dictated by a predetermined "limit delay time"; see also col. 3, lines 53-59); and

adjusting a target frame rate based on a current amount of time taken to compress said video frame of raw video image data (col. 7, lines 4-63, Note the frame rate is increased or decreased to achieve a target bit rate for each frame within the time delay limit).

Re claims 5, 14 and 23 read on Chujoh at col. 7, lines 23-35.

Re claims 6, 15 and 24 read on Chujoh at col. 1, lines 53-65, col.7, lines 23-35. In effect, a division by a natural number in Chujoh (col. 7, line 28) reads on an integer divisor between 1 and 30.

Re claims 1-3, 7-12, 16-21 and 25-27 have been canceled.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

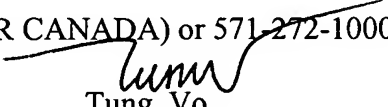

Shimoda (US 5,440,345) discloses high efficient encoding/decoding system.
